Xiamen University Malaysia

SKILLS

Python | C | MATLAB | JavaScript | PyTorch | scikit-learn | NumPy | pandas | matplotlib | GitHub | VS Code | Jupyter

LANGUAGES

Chinese: Native

English: IELTS 6.0 certified; currently at IELTS 7.0+ level; retake target 7.5+

INTERESTS

Embodied AI and intelligent agents

Computer vision and multimodal perception

Large language models for domain applications

PROFILE

High-performing Artificial Intelligence undergraduate with strong academic performance and early research experience in computer vision and data pipelines. Interested in embodied AI, computer vision, large language models, and multimodal AI systems. Seeking internship and research opportunities to further develop practical AI engineering skills.

PROJECTS

Agricultural Disease Classification System

Supervised by Prof. Yinqqian Zhang

- Built and optimized a 26-class image classification dataset, including data cleaning, normalization, and train/validation/test splitting.
- Trained and refined ResNet50-based models, achieving stable performance at ~70%+ validation accuracy after dataset refinement.
- Addressed long-tail class imbalance through dataset restructuring and data refinement strategies.
- Designed a confidence-threshold-based inference mechanism (REVIEW_NEEDED) for deployment-oriented decision workflows.
- Implemented batch inference pipelines and generated CSV-based evaluation reports with accuracy and F1-score metrics.

Oil Palm Agronomy Q&A Extraction Pipeline

- Built an automated pipeline converting academic papers into structured Q&A datasets (JSONL) for LLM fine-tuning.
- Implemented Markdown parsing, text chunking, LLM-based extraction, strict JSON validation, and post-processing.

Interactive Systems Lab

- Developed browser-based interactive systems including an alchemy puzzle game, escape-room logic game, and 3D runner.
- Designed state-driven interaction logic and implemented web-based experiences using JavaScript and Three.js.

EDUCATION

Bachelor of Engineering in Artificial Intelligence

Xiamen University Malaysia | Sep 2025 - Jun 2029 (Expected)

GPA: 3.81 / 4.00 (Top 5%, Rank 9/170)

Relevant Coursework: Calculus I, Linear Algebra, Programming (C, Python)

HONORS & ACTIVITIES

- Dean's List Award, Bachelor of Engineering in Artificial Intelligence Programme.
- Technology Society Committee Member; involved in technology outreach and activity planning.
- MCM/ICM Participant; responsible for programming support, data processing, and result organization.
